

CENTRE FOR TEACHING AND LEARNING EXCELLENCE @ YUSOF ISHAK SECONDARY SCHOOL

ASSESSMENT AS LEARNING AND METACOGNITION: CONNECTING THE DOTS

Presented in the form of online subject-based sessions facilitated by Master Teachers and colleagues from Yusof Ishak Secondary School, this webinar focuses on how assessment as learning and metacognition are enacted in specific subjects. There will be two webinars on this topic, each of which will focus on different subjects.

Session 1

11 May

3:00 – 5:00 p.m.

- Chemistry
- Mathematics
- Nutrition and Food Science
- Physics

Session 2

6 July

3:00 – 5:00 p.m.

- Chinese Language
- English Language
- Physical Education

Please access this [link](#) for more details about the facilitators and the focus of the respective subject-based sessions.

Associate Professor Lee Ngan Hoe

Office of Education Research (OER) &
Mathematics and Mathematics
Education (MME)
National Institute of Education (NIE)

At the end of the respective subject-based sessions, all participants can also look forward to coming together to connect with Prof Lee Ngan Hoe, Associate Professor of National Institute of Education. Prof Lee will address further questions that participants might have about assessment as learning and metacognition, and/or questions that they might have from their pre-webinar viewing of a video recording of a presentation by Prof Lee* on the connections between assessment literacy and metacognition.

**Note: Prior to attending this webinar, participants would need to view a video recording where Prof Lee will touch on the importance of considering the metacognitive development of learners when designing a sound and comprehensive approach in the practice of assessment in teaching and learning, including assessment for, as and of learning.*
